

## Portcullis House

|                       |   |
|-----------------------|---|
| Project:              | Portcullis House  |
| Sector                | Special   |
| Client:               | UK Government   |
| Contractor:           | Crown House   |
| Value (approx.):      | £4.075 Million  |
| Completion Date:      | 2000  |
| Description of Works: | <p>Portcullis House is effectively an extension to the house of commons and was built to house the overflow of MP's.</p> <p>The work involved the detail, fabrication and installation of ductwork within a series of spine structures located on the building rock. The ducting was installed locally in Horwich where the steel structures were built. Hargreaves became a part of the team working out of the project offices in London.</p> |
